

## **Policy on Validation of Clinical Content**

American Academy of CME will adhere to the following content validation value statements.

- Specifically, all clinical recommendations involving medicine in a CME/CE activity must be based on evidence that is accepted within the profession of medicine, nursing, and/or pharmacy as adequate justification for their indications and contraindications in the care of patients.
- All scientific research referred to, reported, or used in CME/CE in support or justification of a patient care recommendation must conform to the generally accepted standards of experimental design, data collection and analysis.
